POOJA NOOTHI

ABOUT ME

I'm Pooja, a computer science graduate passionate about technology and continuous learning. I've always been intrigued by how technology transforms people's lifestyles, and I want to be part of projects that bring about positive change and make a meaningful impact.

My journey began with building WordPress landing pages using Elementor and Divi, which sparked a curiosity about how coding and functionality work beyond drag-and-drop builders. This curiosity motivated me to dive into coding and learn modern web technologies. Whilst in the process of undergoing a maternity break, and while raising my children - I took a few online courses in React, which only motivated me to further deepen my coding knowledge, which I was fortunate enough to do through _nology.

I've since worked on various projects, from e-commerce websites to horticultural platforms, where I've honed my technical and problem-solving skills. I thrive in collaborative environments and am always eager to learn and improve.

Outside of work, I love to travel, sing, cook, and watch movies to keep me rejuvenated—activities that fuel my creativity and help me unwind.

PROJECTS

GOOGLE BOOK

Developed a book search app in React using Google Books API, displaying book details in a modal. Implemented React hooks for state management and styled with SCSS.

FAKE OS

Built a fake Windows 98 OS using HTML, SCSS, and JavaScript with a clock, clickable menu, and a weather app displaying city-based forecasts.

THE PINK COFFEE CORNER

Developed a cafe shop website using HTML and SCSS with an expandable menu, navigation links, a contact form, and a review section.

WORK EXPERIENCE

_nology | 2024 – CURRENT

Contributed to a student metrics application, implementing new features using TypeScript, React, NestJS, and MySQL. Developed a notification system by creating a JSON server and integrating it with an API. Built a dynamic sidebar layout in Next.js using route groups to support different page structures.

Bite Communications | Digital Production Executive | Oct 2021 – Aug 2022

Customized WordPress sites for Australian horticultural websites, optimizing SEO and UX. Created landing pages and email campaigns, boosting sales and engagement.

Arvensys Technologies | Junior Web Developer | Jun 2020– Aug 2021

Updated WordPress sites for Australian e-commerce, including landing pages, product descriptions, categories, and imagery. Installed plugins, uploaded blogs, and customized themes.

KEY SKILLS

TDD, CI/CD
SQL, MySQL
AWS, Java 8/Spring
CSS
React & Node.js
HTML/SAS JavaScript & Typescript
Jest

EDUCATION

Full Stack Engineer Program
_nology | 2023

Web Development Fundamentals
Online Training | 2020

Bachelor of Technology
JNTU Hyderabad | 2013
